REPORT OF BOARD OF EDUCATION.

To the School District of Swanzey:

The annual report of the Board of Education, including the reports of the superintendent and treasurer, the warrant of the annual meeting of 1911 and our recommendations for appropriations for the ensuing year is respectfully submitted.

On account of extending the winter term of school beyond the close of the fiscal year, it is found necessary to make a change in the form of the report of school attendance, etc. Therefore the following tables represent the record of the latest completed school year:—September, 1909 to June 1910.

SCHOOL No. 1.

Teacher, Laura G. Fitzgerald.

Assistant, Katherine Atwood.

Number of weeks in the year,	35
Number of pupils registered,	56
Average daily attendance,	39.04
Per cent of attendance,	89.45
Cases of tardiness,	37
Wages of teacher, per month,	\$40
Wages of assistant, per month 1st term,	\$24
2nd term,	28
3rd term,	32

Record of perfect attendance. 1st term: Herman W. Ballou, Edwin H. Eastman, Harold H. Hart, George R. Taylor, Paul L. Underwood, Philip G. Underwood, Ellen M. E. Swenson, Leila M. Taylor, Alice M. Verdier, Helen E. Ward, Doris E. Wellington, Hazel G. Hart. 2nd term: M. Marie Christopherson, Leila E. Ellis, Harold H. Hart, Karl F. Underwood, Paul L. Underwood, Philip G. Underwood. 3rd term: Hazel I. Bedaw, Anna M. Murray, Minnie M. Murray, Leila M. Taylor, Karl F. Underwood, Philip G. Underwood.

SCHOOL NO. 2—PRIMARY.

Teacher, Grace H. Davis.

Number of weeks in the year,	33 4-5
Number of pupils registered,	27
Average daily attendance,	18.74
Per cent of attendance,	86.83
Cases of tardiness,	2
Wages of teacher, per month,	\$32

Record of perfect attendance. 1st term: Oliver E. Calkins, Leslie P. Cole, Leslie W. Lovering, Frank M. Streeter, Beatrice M. Aldrich, Zella G. Carpenter, Doris A. Carpenter, Helen I. Noonan, Birdys C. Gordon, Dorothy E. Gordon, Ruth M. Gordon. 2nd term: Oliver E. Calkins, Frank Streeter. 3rd term: Kenneth P. Lane, Dorothy E. Gordon, Margaret Marsh.

SCHOOL NO. 2—GRAMMAR.

Teachers: 1st term, Clare E. Bagley Dodge.

2nd and 3rd terms, Lura W. Holt.

Number of weeks in the year,	33
Number of pupils registered,	26
Average daily attendance,	19.6

Per cent of attendance,	89.99
Cases of tardiness,	23
Wages of teacher, per month, 1st term,	\$32
2nd term,	40
3rd term,	44

Record of perfect attendance. 1st term: Harold D. Blake, Raymond Bouvier, Gordon C. Weber, Bertha E. Cole, Maude C. Streeter. 3rd term: Cecil Lang.

SCHOOL NO. 5.

Teachers: 1st and 2nd terms, Mary L. Carlin.
3rd term, Margaret I. Dolan.

Number of weeks in the year,	34
Number of pupils registered,	27
Average daily attendance,	20.20
Per cent of attendance,	87.72
Cases of tardiness,	21
Wages of teacher, per month, 1st and 2nd term,	\$36
3d term,	41

Record of perfect attendance. 1st term: Cecil Clark, Elmer Dunham, Harry Dunham, Walter A. Johnson, Walter Johnson, Raymond Stone, Mildred Plaisted, Maude Stone. 2nd: Cecil Clark, Maud Stone. 3rd term: Albert Dunham, Raymond Stone.

SCHOOL NO. 7.

Teacher, Genevieve F. Murphy.

Number of weeks in the year,	34 $\frac{3}{4}$
Number of pupils registered,	35
Average attendance,	19.12
Per cent of attendance,	84.78
Cases of tardiness,	26
Wages of teacher, per month,	\$40

Record of perfect attendance. 1st term: Raymond F. Bloom, Charles I. Calkins, Ellen J. Ellor, Mary Stevens. 2nd term: Raymond F. Bloom, Charles I. Calkins, Ellen J. Ellor.

SCHOOL NO. 9.

Teachers, 1st and 2nd terms, Lottie M. Evleth.

3rd term, E. Helena Johanson.

Number of weeks in the year,	33
Number of pupils registered,	19
Average daily attendance,	12.82
Per cent of attendance,	86
Cases of tardiness,	22
Wages of teacher, per month, 1st and 2nd terms,	\$30
3rd term,	36

Record of perfect attendance. 1st term: Charles H. Ballou, Myrtie Starkey, Olan O. Twitchell. 2nd term: Charles H. Ballou, Olan O. Twitchell. 3rd term: Charles H. Ballou.

SCHOOL NO. 11.—PRIMARY.

Teacher, Alice M. Bowen.

Number of weeks in the year,	35
Number of pupils registered,	36
Average daily attendance,	18.26
Per cent of attendance,	83.80
Cases of tardiness,	30
Wages of teacher per month,	\$36

Record of perfect attendance. 1st term: Herman Barlow, Charles Patnode, Napoleon Young, Gertrude Bolles, Irene Haley, Valeria Parda. 2nd term: Gertrude Bolles.

SCHOOL NO. 11.—INTERMEDIATE.

Teacher, Edna C. Whitcomb.

Number of weeks in the year,	35
Number of pupils registered,	34
Average daily attendance,	23.79
Per cent of attendance,	82
Cases of tardiness,	24
Wages of teacher, per month,	\$36

Record of perfect attendance. 1st term: Jennie M. Foster, Dorothy A. Haley, Madeline A. Quinn, Edna T. Rolf, Clesson W. Leonard. 2nd term: Hugh Calkins.

SCHOOL NO. 11.—SUB-GRAMMAR.

Teacher, Ora M. Rixford.

Number of weeks in the year,	36
Number of pupils registered,	33
Average daily attendance,	25.17
Per cent of attendance,	88
Cases of tardiness,	37
Wages of teacher, per month,	\$36

Record of perfect attendance. 1st term: Dorothy Calkins, Vera Crouch, Doris Evans, Margaret Grogan, Francis Aldrich, Richard Frink, Alonzo Hill, Guy Hosley, Bay Nash. 2nd term: Harriet M. Barlow, Arthur LaFountain, Dorothy Calkins, Francis Aldrich. 3rd term: Dorothy Calkins, Grace Gould, Jefferson Robbins.

SCHOOL NO. 11.—GRAMMAR.

Teacher, Susan A. Hanrahan.

Number of weeks in the year,	35
Number of pupils registered,	23
Average daily attendance,	15.69

Per cent of attendance,	89.15
Cases of tardiness,	38
Wages of teacher, per month,	\$44

Record of perfect attendance. 1st term: Olive E. Cass, Edith M. Rainboth, William H. Kellogg, Clifford E. Rolf. 2nd term: Harold Quigley.

Attention of citizens of the school district is called to the fact that no appropriation for repairs was made at the last annual meeting. In consequence of this, only minor repairs have been made during the past year. More thorough attention to repairs will be necessary in the coming year. In addition to this the board feels that it is very important that several permanent improvements be made without further delay and recommend that appropriations be made sufficient for the purpose.

One of the improvements alluded to is the thorough renovation of the heating plant at No. 11. This house has suffered great discomfort and inconvenience from insufficient heating. Reconstruction of the present heaters or purchase of new ones is necessary.

Another desired improvement concerns the supply of drinking water. Water is one of the essentials of life. Water, pure and fresh, should be at hand in abundance and at all times in order to supply growing children with that which is absolutely necessary for their bodily welfare. The lack of it seriously interferes with their proper development. We are now paying out money, for having drinking water brought in small quantities to several of our school houses, which might be more profitably invested in providing wells on school grounds where pupils would have free access to all the drinking water needed with the additional privilege of means for washing hands and faces—a privilege of no small value from a sanitary point of view, especially to those who do not go home between sessions.

Another permanent improvement desired is slate blackboards. A few of these boards have been placed in Nos. 11 and 7, which have proved very satisfactory. The committee hope to see more of them purchased and put in use during the coming year. The slate board has a number of good qualities to recommend it, one of which is that it is more sanitary than the other kinds of blackboard. Less chalk dust is thrown into the air by its use and, by using dustless crayon, which does not work well on wooden boards, it is possible to very nearly eliminate the chalk dust. This dust is very unhealthy. Few people realize the extent to which it pollutes the air of a school room. Chalk particles in large quantities are breathed in by pupils when using chalk and erasers. Slate boards are economical. They do not wear out. Neither do they require a yearly coat of paint or slating as other boards do.

An appropriation of \$190 is recommended for salaries. This will allow the pay of the treasurer to be increased from \$15—the present inadequate salary—to \$25, a sum more proportionate to the work required.

RECOMMENDATIONS FOR APPROPRIATIONS.

The board recommends that the District appropriate, under Article 7 of the warrant, in addition to the amount required by law, \$2,000. This sum includes the estimate for support of schools, repairs and superintendent's salary.

To the Selectmen:

In conformity to law the board recommends the following assessments for the ensuing year:

For high school tuition,	\$750 00
For books and supplies,	500 00
For flags and appurtenances,	50 00

The sum required by law to be raised for support of schools in Swanzey is \$2,415.

GEORGE F. BALCOM.

JESSIE H. MARSH.

A. W. HOPKINS.

REPORT OF SUPERINTENDENT OF SCHOOLS.

To the School Board of Town of Swanzev:

In making this annual report to you and to the town you represent it seems wise to call attention to several particular things and to discuss in some detail a few propositions rather than to make the report general and vague. Many things are omitted for want of space which might well be included, but the affairs presented will serve to indicate the lines along which the work has progressed the past year. The matters to be taken up will occupy four heads:

1. The state of equipment of our schools as regards (a) teaching force; (b) textbooks and supplies.

2. The purposes which have guided in the determination of courses of instruction.

3. The state of education in our schools and the comparison our pupils make with standard grades of work elsewhere.

4. Some suggestions for vital improvements in the future.

The persistent and well-defined aim to secure a trained teaching staff has determined the selection of teachers in all cases where a choice was possible. By "trained" is meant technically educated for the work of teaching. Time was, education being less understood, when it was thought that any average girl or young man of ordinary preparation in the three R's was fully qualified to teach school. Time also was when any man who could do nothing better was thought fit to preach or

work on a farm. But today we all recognize the fact that we need trained doctors, preachers, and trained and experienced farmers if they are to produce results. The human plant thrives best under intelligent treatment; a knowledge, on the part of its cultivator of the laws which govern mental development, a knowledge of how to control the operation of these laws. In other words a cheap education and a cheap teacher is not so much to be desired as a trained teacher. Education is a business and the man who would hesitate to place the care of his cabbages or cows under the care of an ignorant farmer, should also hesitate to put the cultivation of the mind of his child under the care of any one less than the most skilful to be procured. The mind and soul of a child is of some worth, and the cheapness of its education is not the chief thing to be considered.

In September, 1908, there were no technically trained teachers in the town in active service. At present there are five in the eleven schools; Miss Holt at No. 2; Miss Murphy at No. 7; Miss Campbell at No. 5; Miss Willoughby and Miss Wright at No. 11.

The schools at which they were trained are as follows:

Miss Holt, Fitchburg Normal (Mass.) graduated 1907.

Miss Murphy, Fitchburg Normal (Mass.) graduated 1909.

Miss Campbell, Fitchburg Normal, graduated 1910.

Miss Willoughby, Keene Normal, graduated 1910.

Miss Wright, Fitchburg Normal, graduated 1910.

Mrs. Jessie L. Charman, whom we lost from No. 11, in the fall of 1910, was a graduate from the four year's course at Bridgewater Normal (Mass.,) of several years experience. Every one of these trained teachers has proved her superiority over those of inferior education and no experience. The superiority is not always evident at once because of the difference in their ways from those to which people are accustomed; but by being patient and allowing the teacher an opportunity to work out her ideas the great advantage has become apparent. These teachers have made the work more interesting and more intelligent to the children; have introduced many things

of value in child training; have taught the primary children to read much more quickly and readily; have introduced many kinds of profitable and interesting busy work for the children in place of the stupid idleness in which they used so often to sit. Our primary departments are greatly improved this present year.

Nor should credit be refused to other teachers of common sense and experience, who, during the past two years have studied hard to fit themselves better for their work. All of these teachers have been in our service more than one year and have shown themselves extremely progressive and intelligent in improving their schools. No. 1 school at Swanzey Factory has made a most commendable advance under its present staff and No. 9 is back in its old good shape after a little hard experience.

Our schools are getting into fairly good condition as regards the supply of textbooks furnished to the children. A school should be a workshop well equipped with all necessary tools for producing practical knowledge. It should be furnished with books on a great variety of subjects which the children will find of profit and pleasure. Our children are seriously lacking in what might be called "general information" and this is a handicap in their life work. To obviate this lack it is purposed to equip the schools with all reasonable amount of such reading material, geography work, history, natural history, mechanics, agriculture, natural science, government, and hygiene.

The purposes which have guided in arranging courses of instruction have been the desire to give the pupils such instruction, and only such as shall be expected to be of practical value to them in ordinary life; to see to it that they are better grounded in simple subjects rather than ornamented with the curiosities and rare tricks of education; to so teach them to reason that they will develop a real mental power and independence of their own instead of depending on some one else; to make them observers, and accurate ones at that; to cultivate a real ability in the use of their own native language.

In pursuance of these ends the study of arithmetic has been altered from the traditional custom. When we stop to think over the uses we have all had for arithmetic in real life we shall probably find that they have been limited to simple operations. Not one in one hundred ever uses partial payments; not one in a thousand uses bank discount nor cube root. And yet a ridiculous amount of time and an appalling amount of brain wear has been expended over these curios. Furthermore these subjects differ in different states and need to be learned all over again later. But we all have use for practical examples in measurements, whether farmer, mill man, painter, carpenter or the rest. Therefore give pupils plenty of work in mensuration and figures based on them. We wish our children to be able to use fractions rapidly and accurately, not large ones but common ones; to use decimals; percentage; and add, subtract, divide, and multiply rapidly in their heads for simple figures.

We have omitted some of the old traditional and useless subjects and believe in employing the pupil's time with plenty of practice in the arithmetic which he will need for life work.

Geography is less a study of state boundaries, capitals and lost names, and more a study of climate and productions, routes of trade, trade relations of different countries, processes of manufacture, and the life of men.

History is less a memorizing of peculiar dates and events, less a succession of mere facts and more a study of the lives of men prominent in affairs and a study of causes which led to certain results. We have introduced this year considerable reading and study in other history outside of the United States, intending to help the child to understand our own country better by understanding what preceeded America. Readings in the history of ancient nations, Greeks, Romans, English; readings in travel and the ways in which men everywhere live have become a basal part of the education of our children.

Nature study and elementary science are being taught to

some extent particularly the matters relating to emergencies, care of accidents, public care of contagious diseases, relation between alcohol and health, germs, filth, and disease; insects injurious to vegetation; bird-life and its commercial value to the farmer; and some facts relating to forestry.

It will probably occasion no surprise to state that the work of the pupils in some of the schools is not what ought to be expected of pupils in their respective grades. There are probably a good many reasons for this and it is not necessary to assign any particular ones here. It will be sufficient to state the bare fact and that positive steps for the advancement of the work to the proper level are being taken. To get the work up to grade has been the purpose which has governed some of the changes in the West Swanzey school and a brief explanation may not be tiresome here.

In the first place the distribution of the grades in this school is a handicap to effective work. The division has been as follows: Primary room, two grades; intermediate room, two grades; sub-grammar, three grades, and grammar, two grades. But the sub-grammar room is just the place where the child should have some of the best work done with him, and it is just here that the teacher is impeded by more pupils and more grades than in any other room. So as a first step it was thought wise to work for a re-division of the work into eight parts instead of nine. This does not mean the dropping out of any of the work originally in the school, but simply a different distribution of it among the teachers, so that the work shall be more equalized. This plan will give two divisions to each teacher and in the long run allow more rather than less work to be done with the pupils. It will take a year or two longer to get this arrangement working as it should.

In the second place the average child in town seems either to complete his education before the age of fourteen or on arriving at that age leaves school and goes to work. This compels us to adopt some plan by which the pupils' common school course can be finished in the years previous to the age of four-

teen, or at least finished early enough to allow him a year or two to study in high school before his family need his wages. If now he can complete his elementary course in eight years, (he being an average bright pupil who attends to business) he has gained a year for further study. And this year of study should be taken in high school rather than prolonged in our grammar school. The principle is the same as finishing breakfast in order to take up dinner.

And it is a proposition worth the serious attention of the people of Swanzev to devise some way of running at least a two years' high school course for themselves on a sufficiently good basis to be approved by the state.

A certain amount of consolidation of classes has been made at West Swanzev; the fifth and sixth year pupils recite together in some things and the eighth and ninth year pupils the same. There has been a question raised by some parents as to the meaning of this. It does not mean that the present eighth year pupils will not be furnished with another year's study at West Swanzev in the grammar school. It means that they are weak in some of the things which they should have learned in the seventh grade and that the ninth are also deficient, and they are now being taught some of these things. The eighth year pupils have not been advanced a grade.

There will be another year of work for these pupils before they will be ready to enter the high school. This next year's work will consist in a review of some of the same subjects taken now but with a different emphasis on these portions; a good sound course in English grammar and language; elementary science; possibly some of the elements of algebra for those who intend to enter high school and who desire it; United States history more completely.

Thus it will be seen that instead of the pupils being advanced a year before their time, it is really a case of review of work which should have been thoroughly learned before and a preparation for real solid high school preparatory work next year.

And for pupils who are not going to high school our schools ought to provide a better training for work. Just what this can be it is impossible to say at present, but to a certain extent school training is out of joint with real life and can be vastly more practical if we are willing to furnish the conditions.

We feel a good deal of satisfaction with the work of our primary grades during this year. When children come to school the first and only thing they can learn is to read. A child must learn to read and read well before he can begin his education. He cannot study books until he can read them and understand what the reading means. So the work of the first year is learning to read. Of course the child has more time at school than is necessary for this one purpose and so he is taught various little manual things which stimulate his interest and quicken his mind to think, the elements of form and proportion through paper-cutting and drawing, and the elements of number. The work of the second grade is teaching to read more rapidly and more difficult matter, number work up through the simple operations, writing a fairly decent hand. By the end of the third year, if the child be well taught, he should be able to read simple reading as well as he ever will, as regards speed and understanding.

The primary work in all these grades is advancing in a most satisfactory manner. The first four years of a child's schooling are by far the most important as far as forming ability and learning how to do things are concerned and it behooves any town to get the best teachers possible to oversee the starting years of education. A child well started has half the battle fought.

It may be in place here to explain a little about the system of promotion introduced into the two lower grades. It often happens that a child will by native wit or other conditions, such as being taught some at home, learn to read very rapidly and will practically be able to read as well at the middle of the year as the average child will at the end. We have adopted the plan of promoting such children at the middle of

the year to the second grade and allow the child to take up work with these pupils the remainder of the year. This is a distinct saving in child power, enabling him to go ahead as fast as nature intended he should, saving him time, and by feeding his ambition, will tend to make a brighter child of him forever. Nothing is so discouraging to a child of high powers as to be kept for any unnecessary length of time with children who cannot go as fast. And the slower children also suffer from the presence of the superior child.

It is hoped to devise some workable plan of similar promotion between the third and fourth grades. The upper grades have their work more systematic and such schemes are hardly workable there.

Two of the most desirable additions to our school system of studies would be drawing and music, vocal music of course. Any child whether of musical talent by which he may excel or not can derive considerable profit from the understanding of the theory of written music and a knowledge of the elementary technical parts. There is also vocal talent enough native to our pupils to develop many good voices through what could be given in school. As to drawing, the practical side of this cannot be denied. Drawing of all sorts has a commercial value and is used to a greater or less extent by all people perhaps even as much as arithmetic. Under school instruction in drawing would be included teaching color work, harmonies, decorative schemes, simple design work; pencil work of all sorts; brush drawing with black and with water colors; and some mechanical drawing for upper grades. The value of a simple knowledge of drawing to a blacksmith, carpenter, or plumber, as well as to a designer or engineer is apparent without lengthy argument. The cost of having it taught in our schools would vary according to circumstances, but a supervisor could be employed in connection with other towns at reasonable wages. In almost all of the more important towns of this county both music and drawing are taught. The cost per year for such teaching, one visit each

week being made to the schools, would be about \$200 per year for salary and supplies, besides the cost of transportation to the several schools.

A word in explanation of the eye tests being made in the school is in place. We believe that teachers and school officers have an opportunity of observing defects in a child's eyesight which might escape the attention of the parent at home. Book work is very taxing to the eyes and often a defect in vision seems so natural to the child through constant having it that it will not be thought strange to him. But we are constantly finding children backward in their studies through not being able either to read print readily or to see the blackboard and so we are finding out this year how many of our children have defective vision. The simple method of testing employed by us is the same used by expert opticians, viz. the Snellen Test Letters, and is the test prescribed by the law of Massachusetts. This test will not detect some serious defects in eyesight but will detect near-sightedness and pronounced astigmatism. After the testing of all the children is completed the parents will probably be notified in some way as to the vision of their children. We do not recommend any particular optician, nor do we urge the parent against his wishes to attend to the child. We simply assume that most parents will be glad to learn of such defect and report to them conditions as they are and leave them to act entirely as they see fit.

Respectfully submitted,

H. H. PRATT.

Treasurer.

Having examined the foregoing accounts, I do hereby
certify that I find them correctly cast and well vouched.

MILAN A. DICKINSON,
Auditor.

VITAL STATISTICS.

To the Selectmen:

In compliance with an act of the legislature, passed June session, 1887, amended by the legislature of 1899, requiring "clerks of towns and cities to furnish a transcript of the record of births, marriages and deaths to the municipal officers for publication in the Annual Report," I hereby submit the following:

BIRTHS REGISTERED IN THE TOWN OF SWANZEY, N. H., FOR THE YEAR ENDING DEC. 31, 1910.

Date of Birth.	Name of Child (if any).	Sex and Condition.		Name of Father.	Maiden Name of Mother.	Occupation of Father.	Birthplace of Father.	Birthplace of Mother.	Age of Father.	Age of Mother.
		Male or Female.	Living or Stillborn.

I hereby certify that the foregoing transcript of births, marriages and deaths is correct, according to the best of my knowledge and belief.

GEORGE I. CUTLER,
Town Clerk.

[TOWN WARRANT.]

THE STATE OF NEW HAMPSHIRE.

To the inhabitants of the town of Swanzey, in the county of Cheshire, in said state, qualified to vote in town affairs.

You are hereby notified to meet at the town house in said Swanzey, on Tuesday, the fourteenth day of March next, at nine of the clock in the forenoon, to act upon the following subjects:

1.—To choose all necessary town officers for the year ensuing.

2.—To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriation of the same.

3.—To see how much money the town will vote to raise for state road, or take any action thereon.

4.—To see how much money the town will vote to raise to decorate soldiers' graves.

5.—To see how much money the town will vote to raise for Richardson Park.

6.—To see if the town will vote to observe Old Home Week and raise money for the same.

7.—To see if the town will vote to raise one hundred dollars for the support of Stratton Library.

8.—To see what the town will vote to do with the George W. Stratton Library fund.

9.—To see how much money the town will vote to raise for the care of cemeteries.

10.—To see if the town will vote to accept the fund of one hundred dollars from Albert Barber, to care for cemetery lot.

11.—To see if the town will vote to accept the fund of two hundred dollars from George Holbrook, to care for cemetery lot of Clark B. Holbrook.

12.—To see if the town will vote to accept one hundred dollars to be known as the Knight fund, to care for cemetery lot.

13.—To see if the town will vote to put a pier under the covered bridge near Westport and raise money for the same, or take any action thereon.

14.—To see if the town will vote to lay a pipe from the tank on the common, to the Snow & Brindell Co.'s shop, and place a hydrant there, or take any action thereon.

15.—To see if the town will vote to put in electric lights, commencing at the end of the Electric railroad and extending to Swanzey Center as far as Mr. Downing's, past the residence of P. E. Gay.

16.—To see if the town will vote to raise money for electric lights, or take any action thereon.

17.—To see if the town will vote to put in lights near the house of Henry Capron and of W. E. Pyne.

18.—To see if the town will vote to have electric lights put in the town hall, and have one electric light put near the depot in Swanzey, and raise money for the same.

19.—To see if the town will vote to install a water tank in Swanzey Center for fire protection, and raise money for the same, or act thereon.

20.—To see if the town will vote to give Golden Rod Grange free use of hall, for the ensuing year.

21.—To see if the town will vote to exempt Mt. Caesar Library property from taxation.

22.—To see if the town will vote to refund the taxes collected in 1909, to the Mt. Caesar Library Association.

23.—To see if the town will vote to give F. E. Williss a pool table license.

Given under our hands and seal, this twenty-fourth day of February, in the year of our Lord nineteen hundred and eleven.

EDWARD B. HOLBROOK,
JOSEPH L. STARKEY,
DELBERT R. BLAKE,

Selectmen of Swanzey.

A true copy of warrant—Attest:
